To whom it may concern

**Letter of Reference: Pinnacle Projects**

Dear Reader,

Pinnacle Projects have been engaged to do the complete design and detailing of the Component Rebuild Centre where the repair and maintenance of the components for the Heavy Mining Equipment is to be undertaken. The scope of the work included the civil, structural, ventilation of the main workshop and shot blasting and spray painting bays complete with the data packs.

I would recommend Pinnacle Projects to any company locally or internationally who intend to undertake any major projects and requires first class designs, modeling and detailed draughting work where precision is required and thus ensuring that all fabrication and construction work meets the expectations of the client.

Kind Regards,

Mike MacMillan  
Unit Manager Projects
